RESEARCH**

**Post Graduate Examinations, November 2023**

**Time: 180 Minutes**

**Max Marks: 100 Marks**

**General Surgery Paper II**

**QP CODE: P3132**

*Your answer should be specific to the question asked*

*Draw neat labelled diagrams wherever necessary*

1. Describe the various cleft palate anomalies. Discuss their clinical features and management.
2. Mention the classification of mandibular fractures. Discuss its clinical features and management.
3. Classify parotid tumors. Discuss clinical features, management of carcinoma parotid.
4. Discuss the etiology, pathology, clinical features and management of medullary thyroid carcinoma
5. Discuss the etiopathogenesis, clinical features and management of gynaecomastia of breast.
6. Describe etiology, clinical features and management of Pulmonary thromboembolism.
7. Discuss the different types of diaphragmatic hernias. Discuss the clinical features and management of Diaphragmatic Eventration.
8. Discuss the etiopathology, investigations and management of pheochromocytoma.
9. Enumerate causes of hypercalcaemia. How will you investigate and manage primary hyperparathyroidism?
10. Mention the etiopathogenesis, clinical features and management of nasopharyngeal carcinoma.

**SRI DEVARAJ URS ACADEMY OF HIGHER EDUCATION AND  
RESEARCH**

**Post Graduate Examinations, November 2023**

**Time: 180 Minutes**

**Max Marks: 100 Marks**

**General Surgery Paper III**

**QP CODE: P3133**

*Your answer should be specific to the question asked*

*Draw neat labeled diagrams wherever necessary*

1. Discuss the etiology, clinical features and management of carcinoma lower third esophagus.
2. Discuss about etio-pathogenesis, clinical features and management of Hydatid liver disease.
3. Discuss the types, clinical features, management and complications of common bile duct stones.
4. Discuss etiology, clinical features, investigations and treatment of carcinoma gall bladder with special mention of its staging.
5. Describe the anatomy of retroperitoneum. Discuss the etiology, clinical features and management of retroperitoneal fibrosis.
6. Discuss the etiology, pathogenesis, clinical features and management of burst abdomen.
7. Discuss the etiology, clinical features, classification and management of diverticular disease of colon.
8. Mention the different positions of appendix. Describe the etiology, clinical features and management of appendicular abscess.
9. Classify ano-rectal abscess. Discuss the etiology, clinical features and management of perianal abscess.
10. Describe the pathophysiology, clinical features and management of strangulated hernia.

**SRI DEVARAJ URS ACADEMY OF HIGHER EDUCATION AND  
RESEARCH**

**Post Graduate Examinations, November 2023**

**Time: 180 Minutes**

**Max Marks: 100 Marks**

**General Surgery Paper IV**

**QP CODE: P3134**

*Your answer should be specific to the question asked*

*Draw neat labelled diagrams wherever necessary*

1. Discuss the Etiology, Clinical features and staging of carcinoma urinary bladder. Describe management of stage 3 carcinoma urinary bladder
2. Mention the complications of fracture. Elaborate on clinical features and management of fat embolism.
3. Classify head injury. Describe clinical features. How will you investigate and treat a case of head injury in a 10 year old child.
4. Mention the types of spinal dysraphism. Discuss the clinical features and management of spina bifida
5. A 30 yr old male is brought to the casualty with chest injury following a road traffic accident. Discuss the clinical features and management.
6. Discuss the different types of diaphragmatic hernias. Discuss the clinical features and management of Diaphragmatic eventration.
